24% reported a reduction²

Predictable outcomes

Highly predictable¹

Less predictable with higher vision correction⁴

Patient Experience

Outpatient procedure

Yes

Yes

15-20 minute surgery

Yes

Yes

Local anesthesia

Yes

Yes

Minimally invasive

Yes, 3 mm opening

Yes, 7-9.5 mm corneal flap

The “Wow” of immediate visual acuity

Yes

Yes

1-2 day short recovery time

Yes

Yes, with additional 1-2 weeks for “flap” healing

Contributes to “Dry Eye”

No

Yes, over 29% report some occurrence³

Future Vision Versatility

Removable

Yes

No, corneal tissue cannot be replaced

Vision correction flexibility

Yes, removability does not limit future treatment options

Limited if additional treatments involve the cornea

UV protection

Yes, blocks 100% of harmful UVA and UVB light⁶

No

Patient Types

Mild to moderate nearsightedness

Yes

Yes

High nearsightedness

Yes

Limited by corneal thickness and pupil size

Thin cornea

Yes

Limited range of nearsighted correction

Large pupil

Yes

Greater chance of increased unwanted aberrations
